  software engineering 2018-2023

About Me

As a **Frontend** Developer with expertise in **React**, I am passionate about creating beautiful and functional user interfaces that deliver a seamless user experience. With **1.5 years of experience** in the industry of **design ui** and **state management**, I am a creative problem solver who enjoys collaborating with other developers and designers, **I am always eager to learn and grow**. Whether working on large scale projects or small, innovative prototypes, I bring the same level of dedication and enthusiasm to everything I do.

Experience

SKY Services Group | Frontend Developer
9/2023– Present

Key responsibilities:
- Working on projects using **Next.js** and **TypeScript**
- Assisted with troubleshooting and bug fixing as needed.
- Worked closely with back-end developers to ensure seamless integration of front-end and back-end functionality.

Al-Yousser Company | Frontend Developer
5/2022– 9/2023

Key responsibilities:
- Worked on several projects using React, including [**ERP**], [**QrReader for Worktime**] , [**Applying for job opportunities**] and [**real-time chat app with Socket.io**].
- Collaborated with designers and other developers to create responsive and mobile-friendly web applications.
- Implemented best practices for front-end development, including code reviews, and version control.

projects

- E-commerce website using React and **Redux toolkit**.
- Social media platform using React and **tailwind** css for design.
- Many Responsive portfolio website
- And other small projects.
